

Education

University of California, Irvine

Master's of Science in Data Science

Specialized in Machine Learning, Big Data Analytics, and Data Mining.

Irvine, United States

Aug 2023 – Jun 2025

GPA: 3.6

SRM Institute of Science And Technology

Bachelor's of Technology in Computer Science Engineering

Specialization in Software Engineering.

Chennai, India

Aug 2019 – Jul 2023

GPA: 3.7

Professional Experience

ThinkComputers

Data Analyst

Lucknow, India

Jan 2026 – Present

- Built OCR and computer vision pipelines to extract, clean, and validate structured data from consignment notes and operational document images.
- Developed license plate detection workflows using image preprocessing, region localization, and text extraction techniques to automate vehicle information capture.
- Improved extraction accuracy by refining candidate scoring, normalization, and rule-based validation to handle OCR noise, handwritten fields, and low-quality scans.
- Supported scalable Python-based processing and API-driven testing workflows for document intelligence solutions used in business operations.

Environmental Record Search (ERS)

Data Analyst

Laguna Hills, United States

Jan 2025 – Oct 2025

- Managed ingestion, cleaning, and reconciliation of nationwide environmental datasets including UST/LUST, Superfund, Hazardous Waste, Schools, and State Response records.
- Developed ETL/ELT pipelines using PySpark, dbt, and Snowflake; automated QA checks and delta-tracking workflows to improve data reliability.
- Wrote advanced SQL using CTEs and window functions for geospatial analysis, change detection, and cross-dataset validation.
- Led geocoding and address-normalization workflows and built Neo4j graph models to improve spatial accuracy and relational linkage analysis.

University of California, Irvine

Teaching Assistant – Computer Systems and C Programming

Irvine, United States

Sep 2024 – Dec 2024

- Assisted with instruction in computer architecture, C programming, assembly language, and data representation.
- Led lab sessions on functions, recursion, and memory management; guided debugging, grading, and concept mastery.

LiveGood Inc.

Data Analyst Intern

Irvine, United States

Aug 2024 – Dec 2024

- Built analysis frameworks for centenarian demographics; applied K-means and Bayesian models to identify longevity predictors.
- Designed Tableau dashboards and evaluated disease-resistance factors using Random Forest and XGBoost.

Ernst & Young

Data Analyst Intern

Delhi, India

Apr 2023 – Jun 2023

- Conducted analysis for a public distribution system overhaul, improving transparency and efficiency by 30%.
- Integrated PoS across 79,500+ locations, reducing transactional errors by 25% and improving food grain allocation accuracy by 15%.

Projects

Speech Emotion Recognition using VAEs

Fall 2023

- Developed Variational Autoencoders (VAEs) to identify emotions from speech, improving HCI in healthcare-focused settings.

Website Traffic Analytics (AWS)

Fall 2022

- Built a real-time pipeline using S3, Lambda, Athena, and QuickSight; implemented API Gateway permissions for secure access.

Garbage Segregation using Image Classification

Summer 2023

- Developed a CNN and transfer learning model (VGG19, ResNet50) for waste classification to improve segregation accuracy.

Skills & Technologies

Languages: Python, R, C++, SQL

Data Eng: PySpark, dbt, Airflow, Snowflake, SSIS, Dremio, AWS Glue

Databases/Graph: SQL Server, PostgreSQL, MySQL, MongoDB, Cassandra, Redis, Neo4j

Visualization: Tableau, Power BI, Grafana, Matplotlib, Seaborn

Cloud: AWS (S3, Athena, Lambda, API Gateway, EC2, QuickSight)

DevOps: Docker, Kubernetes, Jenkins, Azure DevOps, GitHub, Bitbucket

Specialties: Geocoding, Spatial Analysis, ETL Automation, Data Quality Assurance

Certifications & Achievements

- Advanced SQL for Data Analysis** – Coursera (with distinction)
- SimpliLearn Data Science** – Top 5%
- Data Science and Machine Learning Bootcamp** – Coursera
